

Make a Creature

The source I got this idea from said to make “an ugly creature”. I think that was to take the pressure off from creating something beautiful. This can be a human being, an animal or something in between.

The reason it's called a creature is because it should have some sort of body, head and arms or legs.

You will need a glue gun along with lots of recyclable materials for this activity.

You will need a glue gun since you will be using 3d materials and need a way to connect them. If you don't have a glue gun and can figure out how to connect them with holes and wire, pipe cleaner or a strong glue then go ahead.

After you create and attach the pieces together of your creature you can enhance it with many different materials.

Below are just some of the many materials you can use to create your creature. I'm sure you will find many more around your house. You can also paint or cover any of the parts with fabric or papers that you have.

Materials you can use

- Egg boxes
- Lid containers
- Small food boxes
- Small cans or containers
 - Bottle caps
 - Craft sticks
 - Corks
- Fabric pieces
- Sponges
- Q tips
- Pieces of cotton
- Pieces of wire or pipe cleaners
