Create a Scrapbook Page

Scrapbooking is a very popular activity and you may have done it yourself. A scrapbook page usually uses photographs of your loved ones and then each page is decorated with an assortment of items.

This challenge is to create a scrapbook page from a picture you pull out of a magazine, calendar, book or other source.

Choose something that you can use as a theme to make your scrapbook page. It can be flowers, a landscape, trees, a home anything that appeals to you.

You will then attach this to a page (preferable a harder paper like cardstock) and treat the page like a scrapbook page.

You can decorate the page, border the picture, outline, add flowers, use markers, paint, embellishments or anyone else you find around your house.

I added a list of some other things you can use and below that are some images with a few ideas I found on google just to start you off. You can do your own research as well.

Some extra ideas to use for your scrapbook page

Words from magazines
Borders
Overlays and underlay's (where you mount picture on frame)
Botanicals (can be pressed leaves or flowers)
Colored tape
Post its
Stamps
Stencils
Words on strips of paper
ETC.
